BEFORE THE
PUBLIC SERVICE COMMISSION of
SOUTH CAROLINA
DOCKET 2005-385-E

RECEIVED
2008 APR 21 PM 2:56
SC PUBLIC SERVICE
COMMISSION

In the Matter of the Petition of the Office of Regulatory Staff to Establish Dockets to Consider Implementing the Requirements of 1251 -- Net Metering and Additional Standards of the Energy Policy Act of 2005))))	Pamela Greenlaw's Motion to the Public Service Commission to Keep Docket No. 2005-385-E Open and All Testimony and Briefing Comments Available for Future Reference, Comment, Evaluation, and Action and to Reclassify Net Metering Tariff Structure Design, Tariffs, and Fees as Temporary Instead of Experimental
---	------------------	--

This motion to keep Docket 2005-385-E open and to reclassify the Net Metering Tariff Structure Design, Tariffs, and Associated Charges and Fees as Temporary instead of Experimental is based upon the need for continued public scrutiny and input, as net metering is a matter of direct public interest and public benefit. Furthermore, on their own admission in prior testimony and comments, the utilities have little experience in net metering and, up to the date of this motion, have done little research on effective net metering systems operated by successful utilities in other states.

Keeping Docket No. 2005-385-E open and reclassifying the Net Metering Tariffs Structure Design, Tariffs, Charges and Fees as Temporary instead of Experimental are both necessary to continued monitoring, adjustment, and improvement of net metering in South Carolina.

Not having had the sufficient time as is normally provided before hearings are scheduled, in preparation for the April 22 hearing I was unable both to read through and ascertain the nuances of concepts contained in the wealth of material provided. Hence, I was unable to discover the need for my motion until late. Specifically, I learned from the provided materials of the term and meaning of "experimental" as it relates to tariffs, experimental meaning that the utilities can return to PSC with revisions and changes without public review and input.

Because the lay public and lay intervenors from the public sector could not and cannot possibly know understand the nuances inherent in many parts of the proceedings involved in this docket, I ask the Public Service Commission to accept and pass this motion and my prior motions submitted on Friday, April 18, 2008, albeit late.

Finally, this entire Docket was originally opened with the requirement that one achieve intervenor status in order to actively take a role in the proceedings dealing with net metering. This requirement had precluded "live" public comment, and thus may have been and may continue to be improper. To correct this situation I urge the PSC to keep Docket No. 2005-385-E open and to reclassify the Net Metering Tariffs Structure Design, Tariffs, Charges and Fees as Temporary instead of Experimental.
